ABOUT US

For over half of a century, Cobra has provided sanitaryware products that make your everyday moments just that little bit better. Its wide range of bathroom and kitchen fittings are beautifully designed, flawlessly functional and made according to the highest international standards.

The Cobra offering has naturally evolved to become more lifestyle oriented. Just as bathrooms and kitchens of the past consistently featured Cobra products, so will the future-forward living spaces of tomorrow.

Whether you're a homeowner, an architect, an interior designer or a plumber, Cobra has the perfect product for every project.

Cobra, Here For You.

PRODUCT CARE & MAINTENANCE

Taps and mixers

To maintain the lustre of chrome plated surfaces simply wipe occasionally with a soft damp cloth using a mild dishwashing detergent or soap solution. Rinse, dry and buff with a soft cloth.

Warning!

Many household and industrial cleaners contain abrasives and or harsh chemical compounds and acids. Do not use these cleaners as they may irreparably discolour, dissolve or scuff the chrome plate finish. Avoid using abrasive cloths or scouring pads.

Basins

Clean the basin with soap and water, as and when required. Should stubborn dirt prevail, a slightly abrasive cleaning material such as "Handy Andy" may be used.

Toilets

Clean the ceramic pan with soap and water, as and when required. Should stubborn dirt prevail, a slightly abrasive cleaning material such as "Handy Andy" may be used. The same applies to a polypropylene or thermoset toilet seat. Should a wooden toilet seat be used, a damp cloth must be used to clean the seat. No abrasive material must ever be used. The inside of the cistern should be kept free of dirt, as it could hamper the performance of the flush valve and the inlet valve. Should either of these valves malfunction, ensure that any dirt has been removed from all of the seals.

Urinals

Clean the urinal with soap and water, as and when required. Should stubborn dirt prevail, a slightly abrasive cleaning material such as "Handy Andy" may be used.

PRODUCT CARE & MAINTENANCE

Maintenance

The frequency and extent of maintenance required for this product varies according to prevailing site and operational conditions. No regular maintenance is required and spare parts are available for key components.

PRODUCT WARRANTY 01

LIXIL Africa warrants that their products will be clear of material and manufacturing defects. Appraisal of the above will be done against ruling manufacturing specifications and standards at the date of manufacture. Defective product will be repaired or exchanged at LIXIL Africa's sole discretion. LIXIL Africa shall not be liable for indirect or consequential loss or damage.

THE WARRANTY WILL BE VOIDED UNDER THE FOLLOWING CONDITIONS:

- Products used with water pH falling outside of the guidelines set by the Department of Water Affairs and Forestry or similar body
- Products not installed by a registered or accredited installer
- Products fitted with unbalanced water pressure
- Products fitted without an inline strainer
- Products used with or included in installations where water temperatures are outside of the temperature range stipulated for that product, or as laid down in the Standards for water supply and drainage (SANS 10252 & 10254) or an equivalent international standard
- Products not installed according to LIXIL Africa's or its suppliers' installation instructions or according to valid Water Regulations and general good plumbing practice
- Products which have failed as a result of dirt or debris in pipe-work which has not been flushed prior to the use of terminal fittings
- Where a defect is attributable to the incorrect use or incorrect handling of the product
- Where routine maintenance has been neglected
- If spare parts other than the original spare parts are used during repairs or maintenance of the product;
- If damage was caused by transport by a third-party transporter
- If products are used or intended for display purposes
- If consumables (e.g. filters, filter cartridges, aerators or batteries) or material subject to wear and tear (such as seals or hoses) are affected
- If product damage is as a result of chemicals and cleaning agents, lime-scale build-up, aggressive environmental influences, or disruptions resulting in damage which are caused by freezing or lime-scale build-up
- If the defect is caused by specific environmental circumstances (e.g. excess or negative pressure in the line, excess voltage or under voltage on the line)
- If the defect is attributable to willful or negligent damage to the product by the user or a third party
- Any product installed in such a manner that it is not accessible to do maintenance will not be covered under our warranty

PRODUCT WARRANTY 02

LIXIL Africa reserves the right to review any specific case in order to assess the validity of this warranty. LIXIL Africa may charge a discretionary service fee as may be reasonably determined by itself from time to time, when called out to inspect products which are not LIXIL Africa products or where there is an illegitimate claim.

GLOSSARY + GUIDELINE TABLE

HOW TO READ THIS PRODUCT CATALOGUE

GLOSSARY + GUIDELINE TABLE

PRODUCT FINISH

The majority of our Cobra showroom products are finished with our Cobra PureShine chrome finish. SANS requires a chrome plate thickness of 0.3 microns (μm) to reduce wear on the product. Cobra chrome plating exceeds this with an average thickness of $0.44\mu\text{m}$, while the electroplated nickel substrate on our products exceeds the statutory $12\mu\text{m}$ with an average of $13.75\mu\text{m}$.

Ultimately, users can be assured that Cobra chrome plated products offer superior wear resistance. The icons shown alongside indicate the colour of the corresponding product in the catalogue section of this book.

PRODUCT FEATURES & BENEFITS

Cobra products are produced to offer maximum added value to customers. The various features and benefits of our product portfolio are detailed below.

PureShine

Durable chrome surfaces protect the products from scratches, are resistant to dirt and easy to maintain.

EcoMind

Save precious resources with water-saving technology.

Flow restrictors supplied with Cobra taps and mixers can be easily serviced by home owners. The restrictors are pressure compensating, meaning the stipulated flow will not be exceeded, regardless of inlet pressure.

EasySwitch

For a fresh look, change out the head of your tap without changing the body.

The handle assembly can be removed from Cobra screw down type taps. Depending on the type of headpart used in the tap ($\frac{1}{2}$ " light pattern, $\frac{1}{2}$ " heavy pattern or $\frac{3}{4}$ "), various designs of Cobra handle assemblies can be used to replace the old design.

Dezincification resistant brass (DR/DZR brass)

Dezincification relates to the corrosion of brass. The minimisation of this is a critical aspect of the quality (fitness for purpose) of plumbing fittings that come into contact with water. The risk and rate of dezincification increases with water hardness and the acidity or alkalinity of water (away from a PH of 7).

Dezincification-resistant brass, or DZR/DR brass, is brass that is characterised by exceptional resistance to this type of corrosion. The resistance is achieved by adherence to exacting specifications for chemical composition and careful process controls. All DZR brass must pass an ISO 6509 dezincification resistance laboratory test.

In South Africa, the use of DZR brass for components of brass plumber's fittings come into contact with water is national law. Building inspectors are being trained to demand the removal of plumber's brassware that does not conform to statutory law.

FeatherTouch

The lightest of touches is required for effortless opening and closing of the single lever mixer.

TeamAssist

Trained and dedicated service teams are in place to provide support pre and post installation.

Cobra Genuine

Genuine spare parts are readily available.

Low Water Pressure

Suitable for use in environments with low water pressure.
